EDUCATION

Singapore Institute of Management | University of London

Singapore

London School of Economics and Political Science Academic Direction

(expected graduation year:2027)

GPA: 63.75

SELECTED PROJECTS

Quantitative Investment Research Platform | veibaequant.cn

Aug 2026 - Present

- Developed a Python-based quantitative research platform, registered nine programs and deployed seven cloud modules, integrating QMT, Wind and public-market APIs across A-shares, ETFs and options.
- Validated 24,241 records across nine datasets and screened 5,548 A-share securities at a 98.9% retrieval success rate, with source, date, missing-value and non-synthetic-data checks.
- Built two research engines with 18 signals, including six A-share sentiment factors and 12 Hong Kong equity alpha factors, applying weighted scoring and point-in-time as-of controls.
- Backtested a moving-average and volatility strategy using isolated training and holdout sets, selecting parameters by excess Sharpe ratio less a 0.25 turnover penalty and incorporating commissions, stamp duty and slippage.

ST1215 Course Project

Nov 2025

- Implemented a random-walk Metropolis algorithm in Python and R to sample from a Laplace distribution using Markov chain Monte Carlo, and assessed chain convergence with the R-hat diagnostic.

PROFESSIONAL EXPERIENCES

CICC Wealth Management Co., Ltd.

Fuzhou, China

Investment Manager Assistant

Aug 2026 - Sep 2026

- Synthesised investment findings on an emerging pharmaceutical industrial park across financial, policy and actual-capacity evidence, cross-validating conclusions through site due diligence and industry research reports.
- Coordinated venue materials for CICC's third-quarter Xiang Xin Zhi Yuan strategy conference and produced compliant investor-education content in graphic, audio and video formats, translating financial concepts into client-facing language and reviewing supporting data and materials.
- Researched the embodied-intelligence industry and prepared a roadshow report covering industry dynamics, investment recommendations and the overseas expansion outlook for Chinese companies.

China Securities Co., Ltd.

Fuzhou, China

Investment Intern

Jun 2026 - Jul 2026

- Developed Python and QMT market-data and order interfaces with reconnection and duplicate-order controls for extreme-market scenarios.
- Reviewed investment scope, liquidation thresholds and credit agreements, and checked margin-financing, securities-lending and private-fund documentation for key risk terms.
- Built factor strategies and risk-control checks in the QMT AI Workshop, translating natural-language requirements into executable strategy code.

Shanghai Guiyuan Private Fund Management Co., Ltd.

Shanghai, China

Quantitative Research Intern

Apr 2025 - May 2025

- Automated A-share tick-market and financial-fundamental inputs for backtesting by building data pipelines with Python, Pandas and NumPy.
- Backtested price-volume alpha factors and diagnosed performance through statistical significance and signal-decay analysis.
- Used large language models to retrieve and analyse mainstream research reports, including RMA, Macro Brain and Micro Brain, supporting the workflow from financial hypothesis formation to alpha-factor construction.

Shanghai Shouchang Private Fund Management Co., Ltd.

Shanghai, China

Industry Research Intern

Jul 2024 - Aug 2024

- Supported a PCB industry research report by mapping the upstream and downstream value chain, comparing listed companies' operating and financial data, and producing charts and conclusions for internal investment research.

LEADERSHIP ACTIVITIES AND AWARDS

University of London Global Student Ambassador

2026

- Placed ninth in the relevant age group at the MetaSprint Series, completed the T100 Singapore and SUniG Aquathlon, and trained consistently with the SIM Aquathlon Club.
- Received the Flames of Merit Award and volunteered regularly with Singapore's National Library Board.

Triathlon Team Member

2025

- Competed in the MetaSprint Series(9th in group) and SUniG events as part of sustained multisport training and team participation.

TECHNICAL SKILLS

Programming: Python, R, SQL

Quantitative Research: QMT, API integration, backtesting, factor research, Pandas, NumPy

Tools: Git, GitHub, LaTeX
